What is Pool ColourGuard®

Pool ColourGuard® is the only dual surface system with a clear layer protecting the colour layer. One-coat applications have the colour in direct contact with UV rays and chemicals.

Only Pool ColourGuard® can offer you a patented surface protection system for fibreglass pools that resists the effects of UV rays and chemicals. It's like sunscreen for your pool, protecting it from colour loss and weathering. Incorporating a specialised dual coat system as part of the manufacturing process, two layers are merged to provide extraordinary surface protection.

With a brilliant, high gloss finish that lasts year after year, your pool will maintain its beautiful appearance thanks to the innovative and unique Pool ColourGuard® technology. Beware of imitations. We dare you to compare.

Pool ColourGuard® Dual Coat System

Countrywide Pools
